## NEWS – New mobile application WEBDISPECINK

With our new mobile application you have convenient access to company vehicles also using your mobile phone.

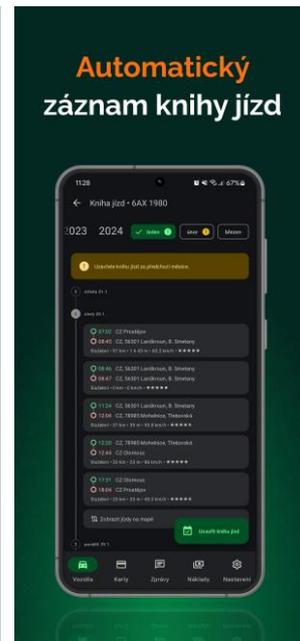

It is available for both [iOS](#) and [Android](#) phones system.

# NEWS – New mobile application WEBDISPEČINK

The application provides up-to-date information on status and location of the vehicle with the option of displaying it on a map.

Records the logbook, including the breakdown between business and private journeys.

# NEWS – New mobile application WEBDISPECINK

Provides **cost records**

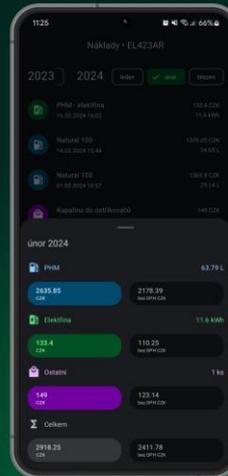

- receipts for refueling, washing or servicing can be entered into the application very easily.

Last but not least the application allows you to leave a **message** for your fleet manager, dispatcher or other users of the vehicle.

The application also includes the ability to identify and driver or crew to log in for a journey, change the type of journey business/private and entering the purpose of the journey.

I.e. the same functionality known from the WD driver mobile application.

**Náklady za provoz vozidla**

**Zprávy od uživateľů a vozidel**

**Palivové a dobijecí karty**

## NEWS – New mobile application WEBDISPECINK - FAQ

Here is a list of frequently asked questions and answers about the mobile application:

**Question:** Why did you release a new mobile application?

**Answer:** The old version had to be replaced because it was developed in a technology more than 10 years ago and this technology nowadays was already difficult to meet the requirements from Android (Google) and iOS (Apple) manufacturers. At the same time, users nowadays demand a more modern and faster user interface appearance.

**Question:** Why didn't you inform us about this change in advance?

**Answer:** The information was published in the newsletter World of Webdispecink in December 2023 ([122023.pdf](#)).

Customers were offered the opportunity to try the BETA version. Beta testing ran for about 3 months.

**Question:** Will the application come with a manual?

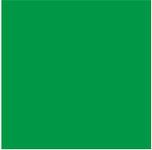

**Answer:** Yes, the manual can be found on the website [www.webdispecink.cz](http://www.webdispecink.cz) under section [support](#).

**Question:** Will the new mobile application include layers (traffic density) and a satellite map?

**Answer:** Yes, will be included in the mobile application.

**Question:** Will it be possible to distinguish the different types of vehicles (cars, trucks, vans, agricultural machinery) by using the icons?

**Answer:** Yes, the icons will change according to the type of vehicle that is registered in Webdispecink.

## NEWS – New mobile application WEBDISPECINK - FAQ

**Question:** Does the mobile application show the current odometer reading in the vehicle?

**Answer:** Not yet, but the last odometer reading can be found from the logbook in the vehicle detail.

**Question:** I've seen driving style ratings for cars, vans, will we also see Perfect drive driver ratings for trucks?

**Answer:** For cars and vans, we display the driving style according to the accelerometer, and we are preparing the driver's driving style display for Perfect drive.

**Question:** Will the new mobile application have statistics?

**Answer:** A basic monthly summary (statistics) for the purpose of approving the logbook is available. Other statistics can be conveniently viewed in our web application Webdispecink. We perceive the size of the mobile display as uncomfortable for displaying large statistics.

**Question:** I need to send coordinates to the driver, how can I do this in the new mobile application?

**Answer:** It is possible to send a message and add your location to it. The driver can then send a message to the dispatcher, including his location, where he is located and where he is waiting.

# NEWS – New component for search

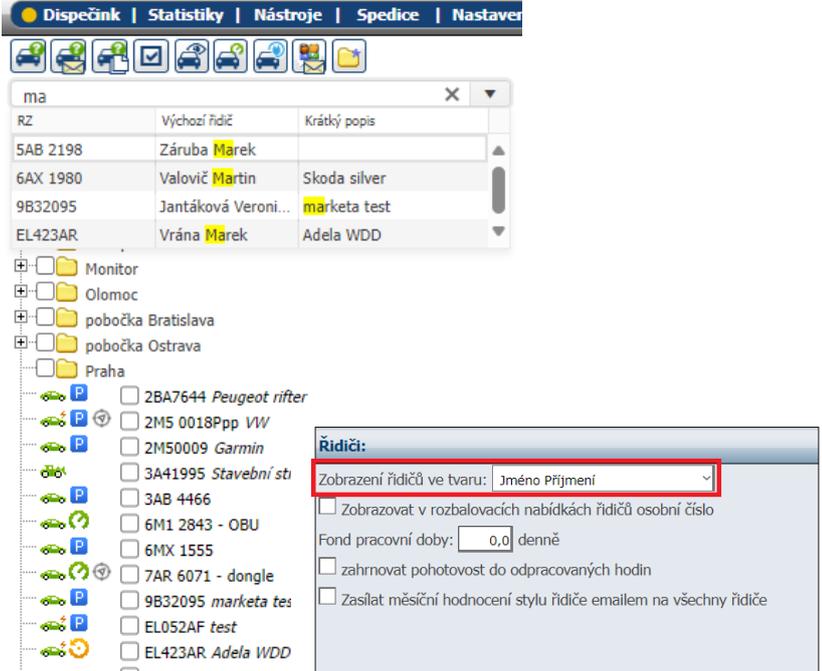

The vehicle search in the vehicle tree on the Dispatching tab searches full-text.

Enter the vehicle's registration number, default driver or a short description and you will see the results for your search. Matching letters in the search records will be highlighted in yellow.

For the default driver, the display format (First Name/Last Name or Last Name/First Name) from the company settings is respected.

Confirm your search (select a vehicle) by clicking on the row or by pressing Enter.

Searching for a discarded vehicle remains the same as in the old search engine.

The screenshot shows the 'Dispečink' software interface. At the top, there are navigation tabs: 'Dispečink', 'Statistiky', 'Nástroje', 'Spedice', and 'Nastavení'. Below the tabs is a search bar containing the text 'ma'. A table displays search results with columns for registration number, driver name, and description. The driver names 'Marek', 'Martin', and 'Marek' are highlighted in yellow. Below the table is a tree view of the company structure, including folders for 'Monitor', 'Olomoc', 'pobočka Bratislava', 'pobočka Ostrava', and 'Praha'. Under 'Praha', several vehicles are listed with checkboxes and icons. A settings panel titled 'Řidiči:' is open, showing a dropdown menu for 'Zobrazení řidičů ve tvaru:' set to 'Jméno Příjmení'. Other options include checkboxes for displaying personal numbers, working time, and monthly driver evaluations.

RZ	Výchozí řidič	Krátký popis
5AB 2198	Záruba Marek	
6AX 1980	Valovič Martin	Skoda silver
9B32095	Jantáková Veroni...	marketa test
EL423AR	Vrána Marek	Adela WDD

**Řidiči:**

Zobrazení řidičů ve tvaru: Jméno Příjmení

Zobrazovat v rozbalovacích nabídkách řidičů osobní číslo

Fond pracovní doby: 0,0 denně

zahrnovat pohotovost do odpracovaných hodin

Zasilat měsíční hodnocení stylu řidiče emailem na všechny řidiče

## NEW - Closing of the logbook for discarded vehicles

Newly, you can also close the logbook for discarded vehicles, where the date of discard is a maximum of 4 months from the current date. After 4 months, the vehicle will no longer be offered.

The screenshot displays the 'webdispecink' application interface. On the left, a sidebar lists various vehicles, with 'Vyřazená vozidla' (Discarded vehicles) highlighted in a red box. The main area shows a map of the region around Kralupy nad Vltavou, with a location marker for 'Biskupice'. A dialog box is open in the center, titled 'Datová uzávěrka:' (Data closure:), with the following fields and options:

- Vozidlo: 1m512345
- Ke dni: 29.02.2024 23:59:59
- Nevidovat soukromé jízdy

Buttons 'OK' and 'Zrušit' are at the bottom of the dialog. Below the map, a table shows trip data for vehicle '1m512345' on '29.02.2024'. The table has columns for 'den', 'čas od', 'čas do', 'mista', 'doba jizdy', 'fdic', 'druh jizdy', 'palivo', 'pomocna cena', and 'ostatni n'. The data row shows 0 for most fields, except for 'doba jizdy' (00:00:00) and 'ostatni n' (0,00). A red box highlights the 'vlož' (save) button in the bottom right corner of the application window.

END

We hope that you have found useful information in the articles in this issue of the magazine that will make working with your fleet even easier.

Thank you for your trust.
