NEWS – Custom texts from Perfect Drive recommendations

You can now **edit the text of driving style recommendations** in the system; these are displayed to drivers as part of the Perfect Drive service and are sent via email and text message.

This allows you to tailor the content of the recommendations to your own needs and communication style.

At the same time, a **language setting for Perfect Drive recommendations** has been added to the driver's settings. Drivers will now receive recommendations in their preferred language; otherwise, the language set at the company level will be used automatically.

This feature is available to you with an **active Perfect Drive package**, and text management is available to company administrators.

NEWS – Improving to manual cost entry in the log book closing guide

We've simplified the process of entering expenses manually and made the foreign currency conversion process in the log book closing guide more transparent.

When entering costs in a foreign currency, the system now offers an instant conversion to the vehicle's currency based on the current CNB exchange rate, just as it does for standard costs.

If you do not perform the conversion when entering the cost, the system will notify you of this during the cost review. In the form, you can select the CNB exchange rate valid on the cost date or enter your own exchange rate.

If the user does not have permission to enter costs, the "Enter Cost" button is disabled.

Navigation bar: [Expense log](#) | [Statistics](#) | [Tools](#) | [Forecasting](#) | [Settings](#) | [Favourites](#) | [Support](#) | [Admin](#)

Tools - User tools - [Deadline Closing Guide](#)

Check of costs

ATTENTION! The number of detected fuel dwellings in the tank is greater than the number of refueling costs, did you forget to load a load?

Costs are entered in different currencies in order to continue all costs must be in the currency of the vehicle. Fill in the required currency rates and have the costs recalculated.

Exchange rates for cost conversion
EUR: ☒ Apply the exchange rate for that day as set by the CNB (i) ☐ Own land - 1 EUR is CZK
USD: ☒ Apply the exchange rate for that day as set by the CNB (i) ☐ Own land - 1 USD is CZK

NEWS - View spare part replacements without a time limit

To provide greater flexibility in analyzing data, we have added a new option, "No time limit," to the Spare Parts Replacement statistics.

When this option is checked, the statistics will display all available records regardless of the specified time period.

NEWS - Higher meal allowance rates for mobile workers in Slovakia

In response to legislative changes, we have added support to the system for higher meal allowance rates for mobile workers in accordance with Slovak law.

Administrators can now decide in the company settings whether the rates for mobile workers will be automatically applied to all drivers or whether this status will be set individually for each employee.

A new rate, Mobile worker, has been added to the Meal Allowances rate table. The ability to import and manage these rates has also been added.

When calculating travel orders, meal allowances, and travel reimbursements, the system automatically evaluates the settings for both the company and the specific driver and applies the appropriate rate.

The screenshot displays the 'Driver Settings' form in the webdispecink.cz system. The form includes fields for Username, Surname, Company, Identification chip / Driver card number (ID 1, ID 2, ID 3), Mobile, Telephone number 2, E-mail address, Group, Division, Centre, Personal number, and Date of discard. A red box highlights the 'Mobile Employee (Use of meal allowance rates for mobile employees to calculate meal allowances and travel orders)' checkbox, which is currently checked.

Below the driver settings, there is a 'Travel order:' section with a red box highlighting the following options:

- ☐ Driver sleeps at home as default
- ☐ Do not count allowances when moving within workplace
- ☐ Travel allowances according to the legal standards of the Czech Republic
- ☒ Travel allowances according to the legal standards of the Slovak Republic
 - ☒ Apply the higher meal allowance rate for mobile workers to all drivers
 - ☐ I will set the higher meal allowance rate for mobile workers individually for each driver
- ☐ UNI allowances - superadmin!
- ☐ Send info about creating/changing CP to driver's email
- ☒ Upload an electronic confirmation to the Travel Order

On the right side, there is a 'Meal allowance:' section with a red box highlighting the following options:

- Duration of business trip: from [] to [] hour
- Country: AD - Andorra
- Meal allowance: [] Pocket money: []
- Currency: EUR
- Sazba stravného: Basic
- Valid from: Basic
- Mobile worker: Mobilní pracovník

The bottom right corner shows a map and a 'Webdispatching - Work - Micros...' window.

NEWS - Number of charging stations now included in the Driver list statistics

The new **Number of Charging Locations** column in **Settings/Drivers** helps you quickly identify drivers who **have charging locations set up**, without having to search for this information in each driver's details.

The column is hidden by default; you can show it via **Column Settings**.

NEWS - New Version of the WD Fleet App 1.11.0

We have released a new version of the WD Fleet app, version 1.11.0, which includes a number of fixes and improvements for an even more stable and convenient user experience.

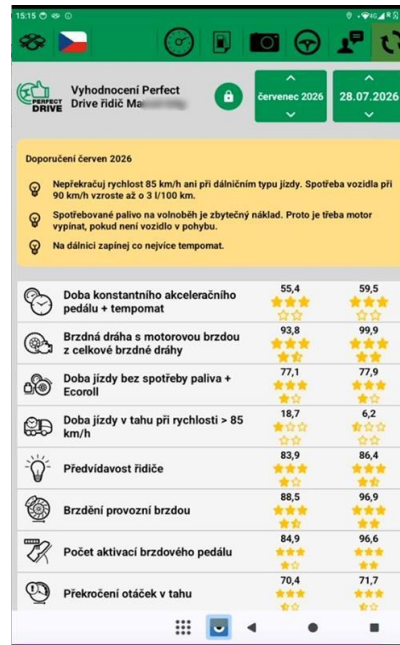

Main changes:

- fixes for reported bugs and app crashes
- fixed German translations

What else is new?

1. Perfect Drive – displaying user defined recommendations for drivers

In the Webdispecink app, under Settings – Lists – Perfect Drive recommendations, you can now add your own multilingual recommended texts for drivers to help improve their rating. We then transfer these texts to the WD Fleet mobile app based on the language selected in the app.

Doporučení červen 2026	
Nepřekračuj rychlost 85 km/h ani při dálničím typu jízdy. Spotřeba vozidla při 90 km/h vzroste až o 3 l/100 km.	
Spotřebované palivo na volnoběh je zbytečný náklad. Proto je třeba motor vypínat, pokud není vozidlo v pohybu.	
Na dálnici zapínej co nejvíce tempomat.	
Doba konstantního akceleračního pedálu + tempomat	55,4 59,5
Brzdná dráha s motorovou brzdou z celkové brzdě dráhy	93,8 99,9
Doba jízdy bez spotřeby paliva + Econoll	77,1 77,9
Doba jízdy v tahu při rychlosti > 85 km/h	18,7 6,2
Předvídavost řidiče	83,9 86,4
Brzdění provozní brzdou	88,5 96,9
Počet aktivací brzdového pedálu	84,9 96,6
Překročení otáček v tahu	70,4 71,7

NEWS - New Version of the WD Fleet App 1.11.0

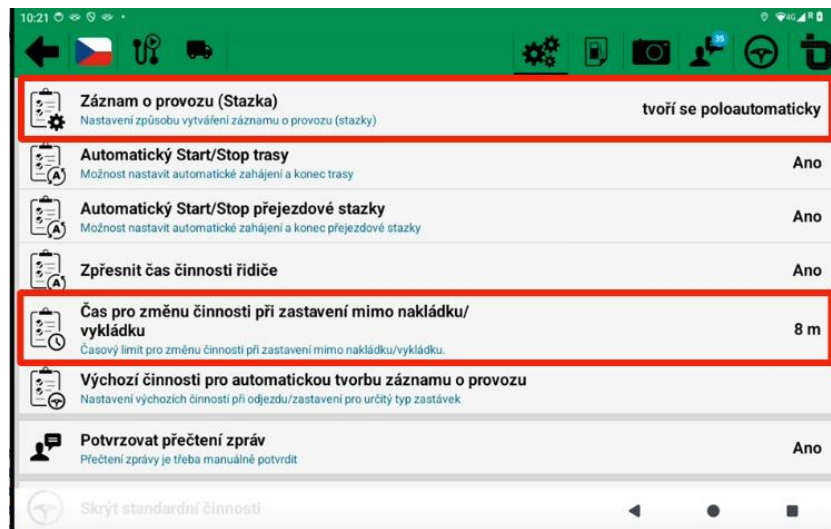

2. Adjustable time limit for the AETR break (8–30 minutes)

Our customers have been very happy with the so-called “automatic stop,” where the WD Fleet app automatically records the stop on the driver's behalf.

As part of our improvements to the automatic stop feature, we have now added the following settings – Settings – Basic function settings – Time for changing activity when stopped outside of loading/unloading.

This parameter allows you to adjust the duration in minutes when the vehicle stops, e.g., for parking, refueling, etc. Some customers also use it for loading and unloading (if the driver does not have a scheduled route).

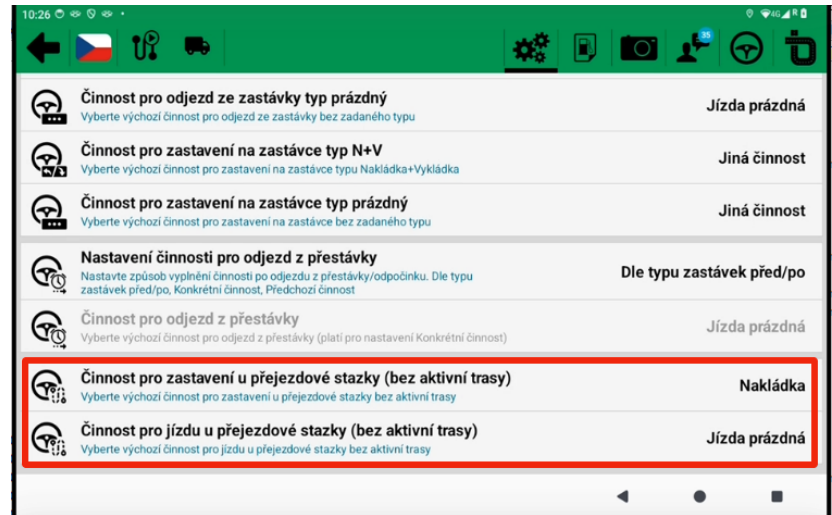

The standard value was 8 minutes, and this can now be changed.

NEWS - New Version of the WD Fleet App 1.11.0

We would like to remind you that in Settings – Basic function settings – Default actions for automatic trip log creation, you can change the default action for both stops and driving during a so-called transit route.

(This is used in cases where the driver does not have a scheduled route.)

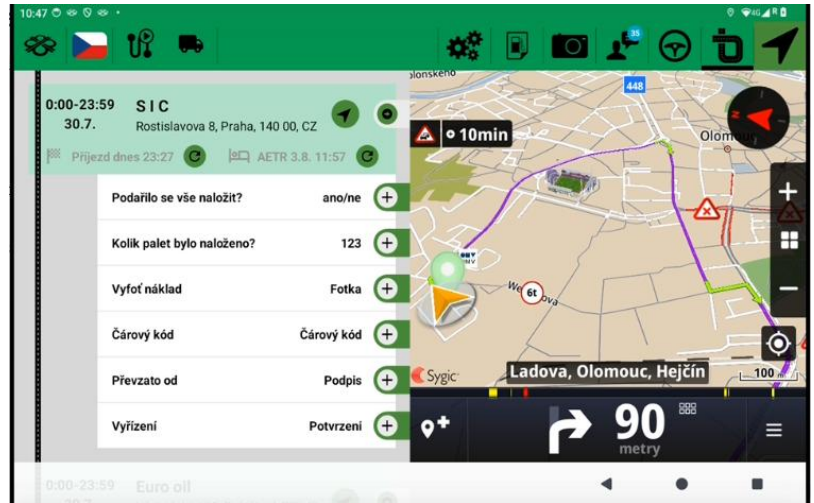

NEWS - New Version of the WD Fleet App 1.11.0

3. Sygic update 26.0.7

Along with the new version of the WD Fleet app, we are also releasing a new version of Sygic Navigation, version 26.0.7.

As part of this upgrade, we were able to resolve a long-standing issue involving occasional crashes of the navigation app and cases where the Sygic navigation app would stop responding.

To report any errors, please use the option in Settings - Diagnostics and Advanced Settings - App Log, where you can describe the problem to us.

END

We hope that you have found useful information in the articles in this issue of the magazine that will make working with your fleet even easier.

Thank you for your trust.
